

All Age Transformation –Co-design Workshop for ACCESS to mental health and learning disability services

Wednesday 7th March – Day three Summary

Highlights:

New faces...

The workshop had involvement from representatives of police, East Midlands Ambulance Services (EMAS), Leicester City social care, Leicestershire County social care and the emergency department to help the ideas and thinking...

A focus on four things...

The day started with a focus on four things:

- How Service users and carers self-referring be managed in the single point of access
- How GP referrals are managed in the single point of access
- How people with crisis would be managed in a single point of access
- What information will be available for self-management and what other routes than telephone will be available.

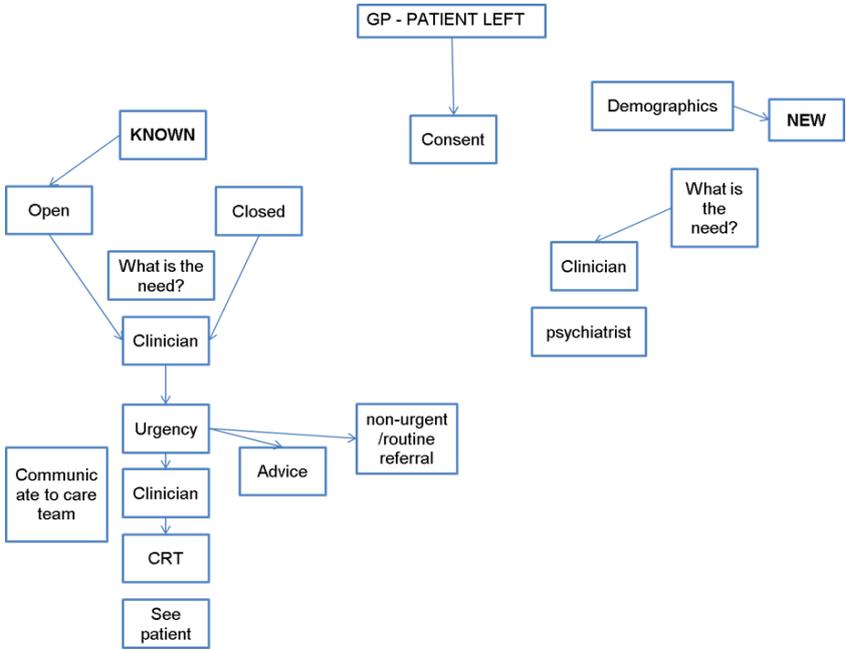

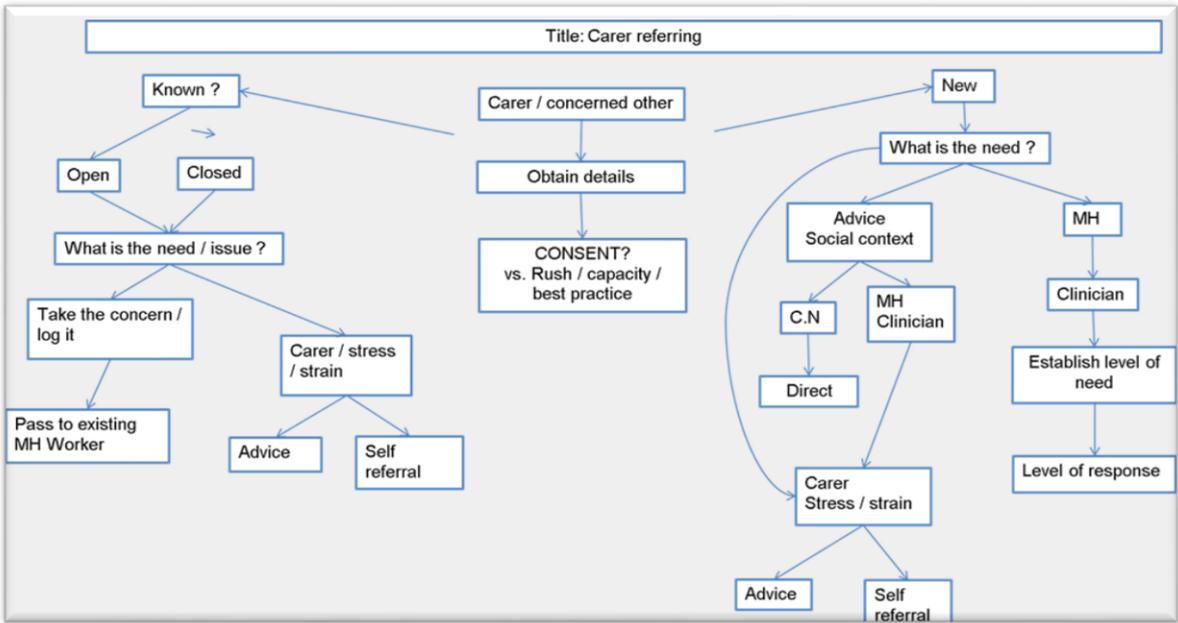

Continued development of the ideas of a single contact point that covers all of the mental health and learning disabilities services

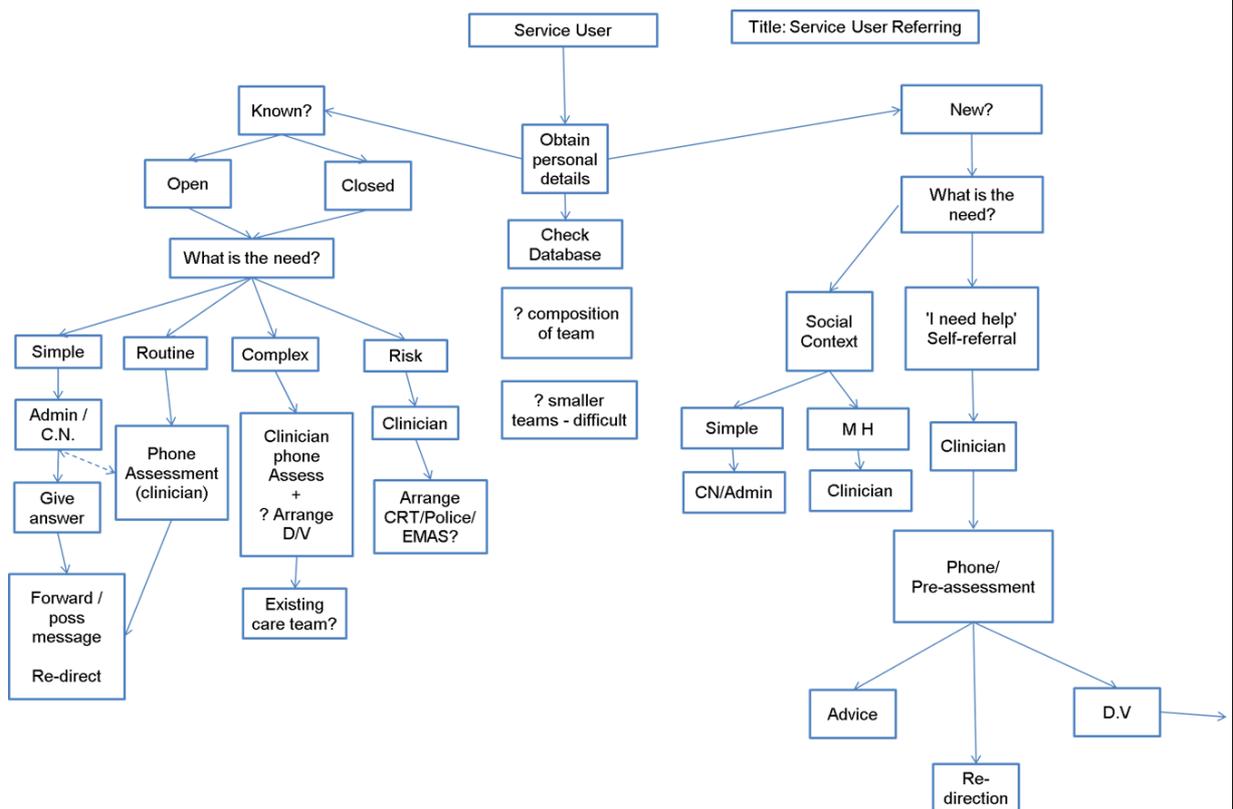

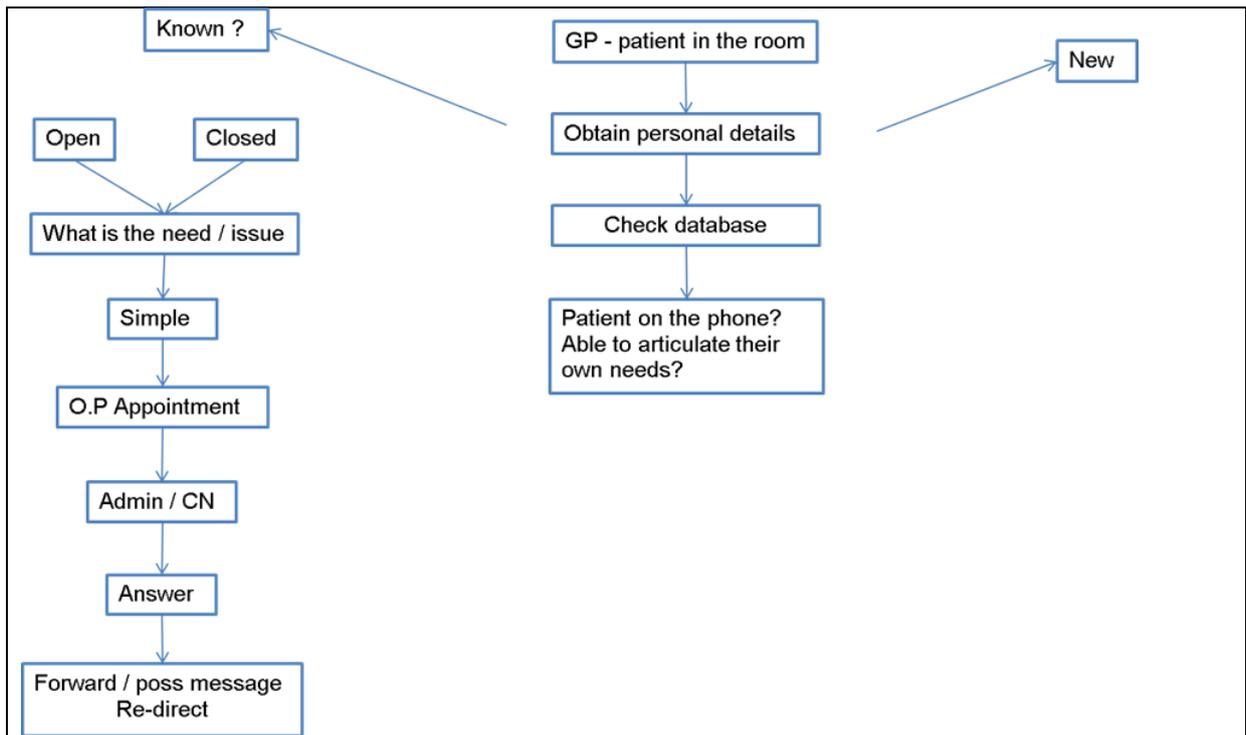

The single point of access was discussed further expanding thinking on triaging depending on how urgent their needs are:

- If urgent they will receive an immediate response 24 hours, 7 days a week from a skilled triage practitioner and subsequent care and assessment as required
- If non-urgent they will be navigated to appropriate support
- There will be signposting available related to other support

There was also thoughts on the skilled triage practitioner needed to deal with non urgent referrals supported by a multi-disciplinary service.

Additional thoughts were put into how a telephone access might work and initial flow charts drawn...

Much much more to think through and work out tomorrow...

Self management, digital self-referrals and safe havens...

A sub-group explored various self-management resources that could be shared online to support people alongside providing access to services from the single point of access. The group also thought about digital access routes into services and the value of apps and other technologies. They also explored the idea of 'Safe Havens' which are places that people
