#	Research Ethics Committee Reference Number	Name of Title	Target number of patients	Target number of patients	Date Agreed to recruit target number of patients	Date Agreed to recruit target number of patients	Trial Status	Target met within the agreed time	Comments
1684	15/06/038	Intervening in Alzheimer's Disease through Angiotensin Targeting: The RADAR Trial. A phase I, randomised, double blind, placebo controlled trial to evaluate the effect of Losartan on brain tissue in patients diagnosed with mild-to-moderate disease	10	10	16/06/2014	16/06/2014	Open	N	CTF as a site has been ready to recruit as of End of July 2014. However sponsor delays in producing medication and feedback of needed calibration of MRI scan has meant this trial volume can't be recruited. Potential participants at site have been identified. Trial delays now mean study is competing with others with similar inclusion criteria and recruitment window therefore more difficult to recruit.
1685	15/06/049	Developing and evaluating a collaborative care intervention for patients with common mental health problems, new to and after release (Stage 2)	10	10	16/06/2014	16/06/2014	Open	N/A	Final phase target achieved, second phase now open
1686	15/07/028	Randomised controlled trial of the impact and implementation of a contingency management intervention for reduction of cigarette use and of relapse in early cessation	10	10	16/06/2014	16/06/2014	Open	N/A	Recruitment is ongoing in compliance with ethics and data scope.
1687	15/07/025	Recruitment in Alzheimer's Disease efficacy trial: The RADAR Trial	10	10	16/06/2014	16/06/2014	Open	N/A	Recruitment ongoing on target
1688	15/08/016	Intervening in Alzheimer's Disease through Angiotensin Targeting: The RADAR Trial. A phase I, randomised, double blind, placebo controlled trial to evaluate the effect of Losartan on brain tissue in patients diagnosed with mild-to-moderate disease	10	10	16/06/2014	16/06/2014	Open	N	Recruitment ongoing on target
1689	15/08/023	Physical activity programmes for improving quality of life in multiple sclerosis with mild to moderate disability: COMPEX: Community and Physical Activity	10	10	16/06/2014	16/06/2014	Open	N/A	Recruitment has been halted until further information is provided in further review of the device
1690	15/08/022	Physical activity programmes for improving quality of life in multiple sclerosis with mild to moderate disability: COMPEX: Community and Physical Activity	10	10	16/06/2014	16/06/2014	Open	N/A	Changes in funding fully allocated controls led to less opportunities for recruitment being delayed - service changes and sponsor inclusion criteria are incompatible with device. No recruitment to date but extensive screening activity in progress. Study medication was delayed at site but four year study
1691	15/08/020	IMPACT: A randomised controlled trial of calcium channel blockers with anticholinergics for the treatment of obstructive pulmonary disease	10	10	16/06/2014	16/06/2014	Open	N/A	Changes in funding fully allocated controls led to less opportunities for recruitment being delayed - service changes and sponsor inclusion criteria are incompatible with device. No recruitment to date but extensive screening activity in progress. Study medication was delayed at site but four year study
1692	15/08/020	IMPACT: A randomised controlled trial of calcium channel blockers with anticholinergics for the treatment of obstructive pulmonary disease	10	10	16/06/2014	16/06/2014	Open	N/A	Changes in funding fully allocated controls led to less opportunities for recruitment being delayed - service changes and sponsor inclusion criteria are incompatible with device. No recruitment to date but extensive screening activity in progress. Study medication was delayed at site but four year study
