

## **The affect of CQUIN on Commissioning**

### **Request**

I am attempting to establish the effect of the advent of CQUIN on Commissioning. I am therefore seeking the following data:

For the year 2010/11

- The value of contracts — placed by PCTs and equivalent commissioners (giving the lead and subsidiary commissioners) for the provision of healthcare services by you
- In each case, the individual elements making up the CQUIN scheme within each contract and the percentage breakdown of the CQUIN Scheme covering 1.5% of contract value – i.e. the proportion of the 1.5% contract value allocated to each of the individual elements within the CQUIN targets for each contract

For the year 2011/12

The equivalent data, if this is available – or a date when the data should be available.

### **Our Response**

Please find attached summarised details of contract values with each commissioner for both years, as requested. The CQUIN details (relating to the contract values) are also attached where available. Please be aware that not all of the contracted amounts attract CQUIN payments, which is why the CQUIN values are slightly under the 1.5% of the total contracted values.
