

## **Child Protection Training**

### **Request**

We are currently garnering information on the child protection training available to the GPs. I would therefore be very grateful if you could assist us with this information gathering exercise by advising us on the following points:

- The child protection training available for doctors in your organisation.
- The method by which this training is funded.
- Whether the budget for this training is ring fenced.

### **Our Response**

**Dr A E Jones offers some child protection training to the GPs in the county and they are also offered the opportunity to attend the set regular sessions that the named nurses deliver. The paediatricians employed by the former NHSLC access level 3 training delivered by the named nurses.**
