

CQUIN Data

Request

Earlier I have requested data on your 2010/11 CQUIN schemes. This request aims to up-date the data to 2011/12. Specifically I am asking for:

- the value of all major contracts for 2011/12 placed on you for healthcare services and the names of the commissioners. These will be by PCTs and equivalent commissioners, either individually or via a lead commissioner. I am not seeking data on **every** contract including minor low value ones (this caused some problems last year)
- the percentage breakdown of the 1.5% CQUIN value by individual indicator - to enable me to calculate the value of each of these

Our Response

You will find the information provided to you in response to this request (please see attached) is different to the response you received to your previous request in March of this year. This is because on 1 April 2011 Leicester City and Leicestershire County & Rutland Community Health Services transferred to the Leicestershire Partnership NHS Trust under the Transforming Community Services Programme and the information provided now includes the Community Health Services major contracts and CQUIN information.

As previously advised, the CQUIN values are slightly under the 1.5% of the total contracted values, as not all of the contracted amounts attract CQUIN payments.
