

Staff engaged in infection control

Request

Please can you let me know how many whole time equivalent staff are employed specifically in infection prevention within your trust (covering all sites where infection prevention staff are employed).

Please break down into the following professions:

- nurses/practitioners
- Scientists
- Doctors
- antibiotic pharmacists

Our Response

We have the following staff employed specifically in infection prevention, although other roles will have an element of infection control within them and we have a Service Level Agreement with the University Hospitals of Leicester to provide microbiological support:

- Nurses/practitioners 6.40FTE
- Scientists None
- Doctors None
- Antibiotic pharmacists None
- Administrative 0.49 FTE
