

Schizophrenia Treatment

Request

We would like to understand how Leicestershire Partnership NHS Trust deals with the treatment of Schizophrenia and therefore we would like to request any documents that are used to cover this treatment area. In particular, if possible, we would like:

- Treatment protocols
- Patient Care-pathways
- Disease Strategies
- Prescribing Guidelines

- We would also like to know if the trust works with any charities, voluntary organisations or private companies to provide Schizophrenia services in your area.

Our Response

Below are shown links which we feel you will find useful.

Formulary

<http://www.leicspart.nhs.uk/Library/Cluster12LPTformat.pdf>

<http://www.leicspart.nhs.uk/Library/Cluster14.pdf>

We also attach documents which we hope will assist you.

The Trust works with other organisations to educate carers on the medication aspect of the illness and

we provide one to one sessions and group sessions on medication related aspects of caring for people with schizophrenia.

Please be aware that should you re-use any of the information which we have supplied to you, you should acknowledge the source of that information.
