## Our Response

On 1 April 2011 the former Leicestershire Partnership NHS Trust, providing mental health and learning disability services, merged with the Leicester City Community Health Services and the Leicestershire County and Rutland Community Health Services. However, pharmacy prescription services for the community health services were provided by the University Hospitals of Leicester NHS Trust until 30 September 2012.

I can confirm, therefore, that for the mental health and learning disability services none of the drugs listed in your request were used in 2011/12.

With regard to the information for mental health and learning disability services in 2001/02 I can confirm we no longer hold this information, but it is the opinion of our Head of Pharmacy that it is unlikely we

would have used any in that year either.

For information relating to the Community Health Services for 2011/12 and 2001/02, I can confirm we do not hold this information and you should direct your request to the University Hospitals of Leicester NHS Trust, who can be contacted at:

<https://www.leicestershospitals.nhs.uk/aboutus/freedom-of-information/contact-us/>

The total cost of spending on all drugs in 2011/12 was £4,458,710.

Unfortunately, we no longer hold the information relating to the total cost of spending on all drugs in 2001/02.
