

## **Electronic Patient Record Systems**

### **Request**

Which clinical & patient electronic systems do you use, if more than one please list?

Are you planning to replace any of the systems in Q1 in the next 3 years?

Do you have an Electronic Document Management System? If yes which system do you use?

Do your clinical systems use digital dictation & transcription technology? If yes which system do you use? Are you planning to replace any of these in the next 3 years?

Do your clinical services use telehealth/telecare technology? If yes which system do you use? Are you planning to replace any of these in the next 12 months?

What reporting/business intelligence tools do you use?

### **Our Response**

Which clinical & patient electronic systems do you use, if more than one please list?

### **Our Response**

TPP SystmOne, Maracis (currently being migrated to CSE RiO), Ethitec Tiara, iSoft Clinicom.

Are you planning to replace any of the systems in Q1 in the next 3 years?

### **Our Response**

Yes – Maracis is moving to CSE RiO over the next 3 years, with the project running now.

Do you have an Electronic Document Management System? If yes which system do you use?

### **Our Response**

Not specifically – however we do use the electronic document storage functions of the clinical systems we have.

Do your clinical systems use digital dictation & transcription technology? If yes which system do you use? Are you planning to replace any of these in the next 3 years?

### **Our Response**

We use the Olympus digital dictation software solution which is clinical system independent. We are continuing to roll out over the next year.

Do your clinical services use telehealth/telecare technology? If yes which system do you use? Are you planning to replace any of these in the next 12 months?

## **Our response**

Not currently, the Trust is currently working with commissioners to understand need and potential areas for development.

What reporting/business intelligence tools do you use?

## **Our Response**

MS Sharepoint/SSRS/SSIS and QlikView
