

## **Trust properties owned by NHS Property**

### **Request**

Please could you tell me if NHS Property Services owns any of the buildings the trust runs services out of?

If so, have any of the buildings required refurbishment or maintenance since April 2013 and did the trust or NHS Property Services pay for this work?

If work was required how much was spent?

### **Our Response**

The Trust occupies 25 buildings where NHS Property Services is the owner.

No refurbishment projects took place in the timescale April 2013 to date, as NHS Property Services have been undertaking a prioritisation exercise this year and any capital expenditure where identified as necessary, is likely to take place next financial year.

Any routine maintenance required to the properties during the period will have taken place through the joint Interserve contract.
