

Wound Care

Request

We would like to know how many patients are currently being treated for wound care in the Leicester City area. An overall number would be satisfactory, but please see below a more specific requirement.

Diabetic lower extremity ulcers
Venous ulcers
Pressure ulcers
Other chronic wounds

Our Response

The total number of patients currently being treated for wound care in the Leicester City area is 943. The following data provides a breakdown of the types of wound being treated, with a further breakdown of referrals where Diabetes was the reason for referral.

		Diabetes (Reason for Referral)
Foot Ulcer	127	8
Leg Ulcer	142	2
Venous Ulcer of leg	189	4
Pressure Ulcer	76	1
Other type of wound	384	10
