

Drug Treatments by Postcode

Request

A list of postcodes for those currently engaging in drug treatment, or, if possible, a list of postcodes for all those who engaged in drug treatment anytime during 2013.

We would only require postcodes – no personal data. However, if possible could the list also include what their primary drug type is?

Our Response

I can confirm full postcodes of service users engaged in drug treatment during 2013 are held by the organisation. However, we are withholding this information, as we consider the exemption under Section 40(2) applies, as we believe when put together with other information service users may become identifiable. Rather than refuse your request, we are enclosing the information with total numbers of service users, partial postcode and primary drug type.
