

## Immunisations containing Nagalase

### Request and Response

#### REQUEST 1 - SG3595:

Please confirm whether or not vaccinations due to our child xxxxxxxx contain the enzyme/protein "Nagalase" with valid proof of this

#### REQUEST 2 – SG3615:

We would like to know if any of due vaccines for our baby xxxxxxxxxxxx contain:

- *formaldehyde*
- *mercury*
- *aluminium hydroxide*

If some vaccines contain one of this we would like to know how this vaccines is called.

We need to know everything about this because those substances (and mentioned before in our letter [FOI/1516/SG3595] to you "Nagalase") are a toxic substances we want to avoid because of chances to cause diseases for our baby.

**OUR RESPONSE:** Leicestershire Partnership NHS Trust does provide immunisations for children of school age. The vaccines we provide for male children are Fluenz, Menveo/Nimenrix and Revaxis. Immunisations for pre-school age children are provided by GPs. Unfortunately, we do not hold the information you have requested as this information is held by the vaccine manufacturers. However, the Electronic Medicines Compendium (eMC) is a freely available website where parents can find patient information leaflets on respective vaccines and key ingredients. Please see below for their website link, [www.medicines.org.uk](http://www.medicines.org.uk)

Please enter the name of the vaccine and select "PIL" tab.
